Date:

Dear \_\_\_\_\_ **MPP**

I have enclosed compelling and relevant information that I would like you to read.

It relates to the recent injunction sought to close down the raw milk consumer cooperative operating at Glencolton Farms and is, obviously, most time sensitive. This package includes several documents of interest that offer insight into Ontario's raw milk farmers' ongoing and provocative issue over raw milk. To join any conversation, and be well-informed, the enclosed documents are the most vital right now.

It is my personal concern that, whether we choose to consume raw milk or not, the actions of the courts in this matter are working against the health and wellbeing of many thousands of Ontario citizens. If just one Ontario constituent is harmed by the inaction of Provincial government in the face of inappropriate and vindictive behaviour by the authorities, based on out-of-date information, then our laws relating to food safety are not fit for purpose.

I would appreciate a considered reply from you which addresses my specific requests as detailed within, and which, offers up-to-date knowledge of the unreasonably grave situation at Glencolton Farms.
